PROFESSIONAL SUMMARY

AI Lead Engineer and Software Engineering master's candidate with a background in media art, interactive installations, and independent product development. Connects user needs to AI-enabled products, Windows systems work, and end-to-end software delivery. Early work pairing physical installations with AI voice interaction informs a human-centered approach to practical engineering.

PROFESSIONAL EXPERIENCE

AI Lead Engineer | DMC Connect

Jul 2026 - Present

- Own technical direction and hands-on delivery for AI and software initiatives, translating business needs into product scope, architecture, AI workflows, and shipped software.
- Lead product and technical work from discovery through implementation and iteration; coordinate integrations, data, cloud services, and quality practices.
- Established AI-assisted delivery practices across specifications, coding-agent workflows, review, evaluation, and documentation; support technical hiring and internal systems.

Workshop Facilitator | AI & Digital Communication

2024 - 2026

- Supported AI, Big Data, and digital communication workshops for corporate and government participants, preparing exercises and helping participants apply tools to communication and decision-support work.

Founder & Developer | Nextzus Optimizer

2022 - 2024

- Founded and developed a Windows optimization utility for gaming PCs, with system tuning, diagnostics, repair, and hardware-aware configuration workflows.
- Self-reported adoption: 3,000-5,000 users.

FEATURED PRODUCTS & RESEARCH

YouNum | End-to-End Product Development younum.me

- Independently designed, built, and launched a Thai-language product from concept through UX/UI, architecture, full-stack implementation, integrations, and iteration.
- Created an AI-assisted dream-analysis and personalized lucky-number experience using Next.js, React, TypeScript, and Supabase.

Decoding Chiang Mai's Khao Soi Experience | Review Analysis 2025 - 2026

- Analyzed 22,664 Google Maps reviews across 11 restaurants; built a multilingual collection and analysis workflow. Accepted for oral presentation at FAB 2026, Chiang Mai University.

SELECTED PROJECTS

MCP & AI Tooling Selected prototypes

- Built Model Context Protocol integrations, web applications, PWAs, and automation tools for AI-assisted research and information workflows.

InAndOn Billing PWA Billing and quotation system

- Built an installable PWA for cash bills and quotations, with document history, shareable records, and a Google Apps Script backend.

Valscout Valorant tactical intelligence

- Built a scouting app combining team and match data with map-pool, roster, and veto analysis for opponent preparation.

LINE AI Secretary Personal assistant

- Designed a LINE assistant for note capture and search, reminders, to-do lists, and calendar actions backed by structured workflows and persistent memory.

EDUCATION & CREATIVE RESEARCH

Master of Software Engineering Candidate | Chiang Mai University, CAMT

2024 - Present

Thesis: A Software Development Approach for Reducing Windows Operating System Latency to Enhance Player Skills in First-Person Shooter Games.

Bachelor of Fine Arts, Media Art and Design | Chiang Mai University

2020 - 2023

BFA thesis (2024): The Beginning of Force - an interactive installation exploring energy and human perception through a Tesla coil, plasma ball, and AI voice interaction. This media-art project established an early interest in human-machine interaction that continues in AI product engineering.

CORE SKILLS

AI & Automation: LLM integration, AI agents, multi-agent workflows, prompt engineering, AI-assisted SDLC, coding agents (Claude Code, Codex, Gemini), MCP, workflow automation

Software Engineering: Python, JavaScript, TypeScript, React, Next.js, Flask, REST APIs, Google Apps Script, Git/GitHub, testing, debugging, Windows systems optimization

Data & Research: Structured data processing, document workflows, web scraping, multilingual text analysis, data collection and research analysis

Cloud & Delivery: Supabase, Google Cloud, Vercel, databases, CI/CD, Docker, Linux, API integration, deployment

Product & Collaboration: Product discovery, requirements, system architecture, technical leadership, UX/UI, interactive media, stakeholder communication, technical documentation, workshop facilitation

LANGUAGES

Thai: Native **English:** Conversational (workplace communication)
