Teeraphat Raksawong

AI Lead Engineer | Product Engineering | Document Intelligence & Automation

Chiang Mai, Thailand | +66 95 036 2311 | pethreeday@gmail.com
GitHub | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

AI Lead Engineer and Software Engineering master's candidate who connects business needs to product direction, AI-enabled systems, data workflows, and software delivery. Experience spans document intelligence, full-stack product development, Windows tooling, applied research, and team-level engineering practices.

PROFESSIONAL EXPERIENCE

DMC Connect | AI Lead Engineer *Jul 2026 - Present*

- Own technical direction and hands-on delivery for AI and software initiatives, translating business needs into product requirements, system design, and engineering work.
- Lead product and technical work across discovery, architecture, AI integration, implementation, testing, and iteration for travel operations.
- Design AI-enabled workflow automation and structured data/document systems; coordinate APIs, databases, cloud services, deployment, and quality practices.
- Build reusable knowledge resources and workflow documentation; establish AI-assisted engineering practices and support technical hiring, cloud services, and internal systems.
- Built an inspectable LiteParse + OCR extraction workflow that preserves document structure and page geometry, links schema-shaped candidates to source context, and supports human review and revision checks.

AI & Digital Communication | Workshop Facilitator *2024 - 2026*

- Supported AI, Big Data, and digital communication workshops for corporate and government participants; prepared learning materials, datasets, templates, and hands-on exercises.
- Guided tool setup and technical troubleshooting, helping participants apply AI and data workflows to communication and decision-support tasks.

Nextzus Optimizer | Founder & Developer *2022 - 2024*

- Founded and built a Windows utility for gaming PCs with automated optimization, diagnostics, repair, and hardware-aware configuration workflows.
- Self-reported reach: 3,000-5,000 users.

FEATURED PRODUCT

YouNum | End-to-End Product & Full-Stack Development *younum.me*

- Independently designed, built, and launched a Thai-language web product from concept through UX/UI, architecture, full-stack implementation, integrations, testing, release, and iteration using Next.js, React, TypeScript, and Supabase.
- Built a Thai-language dream and lucky-number experience with deterministic number generation; AI is disabled in the current MVP.

SELECTED PROJECTS & RESEARCH

Document Intelligence | Structured Extraction & Human Review *LinkedIn article*

- Built a LiteParse + OCR workflow and review interface for PDF content, with reading, text, table, image, and JSON views tied to source-page geometry.
- Extended extraction with evidence retrieval and typed source relationships, and connected agent workflows through defined tools for evidence inspection, proposals, and human input.

Decoding Chiang Mai's Khao Soi Experience | Google Maps Review Analysis *2025 - 2026*

- Analyzed 22,664 Google Maps reviews across 11 Chiang Mai Khao Soi restaurants for food-tourism and consumer-perception research.
- Developed a multilingual RPC-based collection framework and structured analysis workflow, reaching 26-40+ reviews per second during extraction.
- Accepted for oral presentation at The 8th International Conference on Food and Applied Bioscience (FAB 2026), Chiang Mai University.

SELECTED PROJECTS & RESEARCH (CONTINUED)

ClutchG PC Optimizer | Evidence-Led Windows Tooling *LinkedIn article*
- Built a Python desktop optimizer with explanations, backups, and rollback, grounded in research across 23 open-source repositories and 200+ techniques.

Actually Faster? | Technical Book & Research *LinkedIn article*
- Authored a 158-page account of Windows optimization research, evidence, risk, and reversibility; built an AI-assisted pipeline for manuscript, figures, layout, and review.

MCP & AI Tooling | Selected Prototypes
- Built experimental Model Context Protocol integrations, web applications, PWAs, and automation tools for AI-assisted research and information workflows.

InAndOn Billing PWA | Billing and Quotation System
- Built an installable PWA for creating cash bills and quotations, with document history, shareable records, and a Google Apps Script backend.

Valscout | Valorant Tactical Intelligence Platform
- Built a scouting app for coaches and analysts, combining team and match data with map-pool, roster, and veto analysis to support opponent preparation.

LINE AI Secretary | Personal Assistant
- Designed a LINE assistant for note capture and search, reminders, to-do lists, and calendar actions, backed by structured workflows and persistent memory.

EDUCATION

Master of Software Engineering Candidate | Chiang Mai University, CAMT *2024 - Present*
Thesis: A Software Development Approach for Reducing Windows Operating System Latency to Enhance Player Skills in First-Person Shooter Games.

Bachelor of Fine Arts, Media Art and Design | Chiang Mai University *2020 - 2023*
BFA thesis (2024): *The Beginning of Force* - an interactive installation exploring energy and human perception through a Tesla coil, plasma ball, and AI voice interaction. Focus: interactive art design and technology integration.

CORE SKILLS

AI & Automation: LLM integration, AI agents, multi-agent workflows, prompt engineering, AI-assisted SDLC, coding agents (Claude Code, Codex, Gemini), MCP integrations, workflow automation

Software Engineering: Python, JavaScript, TypeScript, React, Next.js, Flask, REST APIs, Google Apps Script, Git/GitHub, testing, debugging, Windows systems optimization

Data & Research: Structured data processing, document workflows, web scraping, multilingual text analysis, data collection, research analysis

Cloud & Delivery: Supabase, PostgreSQL, Google Cloud, Vercel, databases, CI/CD, Docker, Linux, API integration, deployment

Product & Design: Product discovery, requirements, system architecture, technical leadership, web design, UX/UI, interactive media

Collaboration: Stakeholder communication, technical documentation, workshop facilitation, candidate evaluation

LANGUAGES

Thai: Native **English:** Conversational (workplace communication)
