

Teeraphat Raksawong

AI Lead Engineer | AI-Native Software Engineering | Product & Automation

Chiang Mai, Thailand | +66 95 036 2311 | pethreeday@gmail.com | github.com/neckttiie090520

PROFESSIONAL SUMMARY

AI Lead Engineer and Master's candidate in Software Engineering with experience turning operational needs into AI-enabled products, web systems, data workflows, and automation. Leads product and technical work at DMC Connect, including Nexora, across discovery, architecture, AI integration, implementation, and iteration. Combines hands-on engineering, AI-assisted development, and product design to deliver practical tools.

PROFESSIONAL EXPERIENCE

DMC Connect | AI Lead Engineer

Sep 2026 - Present

- Own technical direction and hands-on delivery for AI and software initiatives, translating business needs into product requirements, system design, and engineering work.
- Lead product and technical work for Nexora, contributing across discovery, architecture, AI integration, implementation, testing, and iterative delivery for travel operations.
- Design AI-enabled workflow automation and structured data/document systems; coordinate APIs, databases, cloud services, deployment, and quality practices.
- Build reusable, AI-ready knowledge resources and workflow documentation to support product discovery, research, and operational work.
- Establish structured AI-assisted engineering practices across coding-agent workflows, specifications, review, testing, and documentation; keep product decisions human-led.
- Support technical hiring and candidate evaluation.
- Handle cloud services, Google Workspace administration, and internal-system troubleshooting alongside product work.

AI & Digital Communication | Workshop Facilitator

2024 - 2026

- Supported AI, Big Data, and digital communication workshops for corporate and government participants; prepared learning materials, datasets, templates, and hands-on exercises.
- Guided tool setup and technical troubleshooting, helping participants apply AI and data workflows to communication and decision-support tasks.

FEATURED PRODUCT

YouNum | End-to-End Product & Full-Stack Development

younum.me

- Independently designed, built, and launched a Thai-language web product from concept through UX/UI, architecture, full-stack implementation, integrations, testing, release, and iteration.
- Created an AI-assisted dream-analysis and personalized lucky-number experience using Next.js, React, TypeScript, and Supabase.

SELECTED PROJECTS & RESEARCH

Decoding Chiang Mai's Khao Soi Experience | Google Maps Review Analysis

2025 - 2026

- Analyzed 22,664 Google Maps reviews across 11 Chiang Mai Khao Soi restaurants for food-tourism and consumer-perception research.
- Developed a multilingual RPC-based collection framework and structured analysis workflow, reaching 26-40+ reviews per second during extraction.
- Accepted for oral presentation at The 8th International Conference on Food and Applied Bioscience (FAB 2026), Chiang Mai University.

SELECTED PROJECTS & RESEARCH (CONTINUED)

Nextzus PC Optimizer | Windows Utility

- Built a Windows tool for gaming PCs with automated system optimization, diagnostics, repair, and hardware-aware configuration workflows.

MCP & AI Tooling | Selected Prototypes

- Built experimental Model Context Protocol (MCP) integrations, web applications, PWAs, and automation tools for AI-assisted research and information workflows.

InAndOn Billing PWA | Billing and Quotation System

- Built an installable PWA for creating cash bills and quotations, with document history, shareable records, and a Google Apps Script backend.

Valscout | Valorant Tactical Intelligence Platform

- Built a scouting app for coaches and analysts, combining team and match data with map-pool, roster, and veto analysis to support opponent preparation.

LINE AI Secretary | Personal Assistant

- Designed a LINE assistant for note capture and search, reminders, to-do lists, and calendar actions, backed by structured workflows and persistent memory.

EDUCATION

Master of Software Engineering Candidate | Chiang Mai University, CAMT

2024 - Present

Thesis: A Software Development Approach for Reducing Windows Operating System Latency to Enhance Player Skills in First-Person Shooter Games.

Bachelor of Fine Arts, Media Art and Design | Chiang Mai University

2020 - 2023

Focus: Interactive art design and technology integration.

CORE SKILLS

AI & Automation: LLM integration, AI agents, multi-agent workflows, prompt engineering, AI-assisted SDLC, coding agents (Claude Code, Codex, Gemini), MCP integrations, workflow automation

Software Engineering: Python, JavaScript, TypeScript, React, Next.js, Flask, REST APIs, Google Apps Script, Git/GitHub, testing, debugging

Data & Research: Structured data processing, document workflows, web scraping, multilingual text analysis, data collection, research analysis

Cloud & Delivery: Supabase, Google Cloud, Vercel, databases, CI/CD, Docker, Linux, API integration, deployment

Product & Design: Product discovery, requirements, system architecture, technical leadership, web design, UX/UI, interactive media

Collaboration: Stakeholder communication, technical documentation, workshop facilitation, candidate evaluation

LANGUAGES

Thai: Native **English:** Conversational (workplace communication)
